

# Andrés J. Bueno

Frontend Developer

Frontend developer coursing electrical engineering program. I have been a web developer since I was 16 years old. With deep knowledge in HTML, CSS and JavaScript technologies and good understanding of PHP and MySQL.

I've coursed different certifications where I learned about React, Next and Node frameworks, and how to work with different CSS features as the grid.

I have felt passionate about learning since I was a child, found my happiness in acquiring knowledge and helping others to achieve their goals. Self-taught and empathetic by nature.

I trust the dots will be connected in the future.

## Work Experience

### Web Developer Come Learning (Cartago, Valle)

January 2018 - November 2019

- Developed the web page on PHP which was in charge of collecting students data.
- Developed an MVP which was in charge of connecting struggling students with tutors on different subjects.
- Developed landing page.

## Education

### Electrical Engineer

Technological University of Pereira (Pereira, Risaralda)

January 2020 - November 2022

- I have used Python for data manipulation and variable analysis using Pandas and NumPy, in addition to understanding how electricity works nowadays in an environment-friendly context.

### Technical Software Development

SENA (Cartago, Valle del Cauca)

January 2018 - November 2019

- There I learned my basis of development, the program was focused on the whole process, from analysis to deployment and support of web applications using PHP, CSS and HTML.
